6.2.3 Implementation of e-governance in areas of operation

1. Administration
2. Finance and Accounts
3. Student Admission and Support
4. Examination

Electronic governance or **e-governance** is the application of information and communication technology (ICT) for delivering different services like Administration, Finance and Accounts, Student Admission & support and Examination. The Sapthagiri College of Engineering has own Administration, Admission, Accounts and Examination department to maintain the data and information of students as well as staff. The college has purchased license application software like Tally, Campus Management System, Sapthagiri.org.in, Classic, Sage and MS Office to maintain such information. The accounts department is using Tally package and Sage software to maintain the finance and accounts of the college.

The college has developed its own ERP software, by in-house staff for examination and to maintain staff and student's database. The following are the Hardware and software requirements to develop the ERP software and installation.

HARDWARE REQUIREMENTS

Processor	: Core i3
Hard Disk	: 500 GB
RAM	:16 GB
Frame Work	:Visual basics, JSP

Principal
Sapthagiri College of Engineering
14/5, Chikkasandra, Hesaraghatta Main Road
Bengaluru - 560 057

SOFTWARE REQUIREMENTS

Operating System: Windows 7 and higher Windows Server 2010,

Sentora OS

Front End: Visual basics, JSP

Back End: MYSQL database

The following modules are present in the ERP package.

ERP Modules:

Master information

- College Details (Like College Affiliation, start year, Address)
- Logo's
- Building Details
- Degree and Department creations.
- Regulation Creation.

Student Data

- Student Admission Process
- Student Details import (Like Student Name, DOB, Father & Mother Name, Contact details, Category of seat(Category A, Convener A, Category B and Management B), Aadhar no)

Staff Data

- Staff Details import(Like staff name, Department, Designation, Contact details, Salary details, Allowances & Deductions details, Bio metric registration,)

Principal
Sapthagiri College of Engineering
14/5, Chikkasandra, Heseraghatta Main Road
Bengaluru - 560 057

Attendance

- Individual staff attendance.
- Admin attendance.
- Non-teaching attendance.
- Various types of reports (Like: late entry, in time, out time)

Internal Mark and Attendance

- Upload student marks and attendance by individual staff
- Data upload by AMPS coordinator.
- SMS sent to parents through AMPS software.
- Report generation (Like: Monthly attendance, Internal marks)

Controller of Examination:

- University seat number (USN) uploading
- Room number allocation for each USN
- Seating Arrangements.
- B-form generation
- Room allotment for faculty
- Exam Attendance sheet and question paper packaging generation.

Finance

- Fee allocation for student.
- Fee concession & scholarship allocate for particular student
- Fee paid by various mode (Cash, Challan, DD, Cheque, Card, NEFT/RTGS)
- Various Reports like (Individual student wise, Dept wise, Batch year wise, Overall college wise, Payment mode wise, Concession report).

HR

- Staff allowance & Deductions
- Leave masters.
- Staff grade pay master.
- Staff biometric attendance report.
- Salary calculation
- Monthly salary report.
- Pay bill generation.
- Reports

Principal
Sapthagiri College of Engineering
14/5, Chikkasandra, Hesaraghatta Main Road
Bengaluru - 560 057

Student Feedback

- Feedback master creation.
- Question creation.
- Feedback Header creation.
- Feedback code generation.
- Feedback given by student.
- Feedback reports.

SMS

- Student absentees automatic SMS.
- Internal and external mark SMS
- General Announcements
- Birthday wishes
- Higher authority alert SMS

Student's Portal

- Student bio data
- Student attendance details for current and previous semesters in proctor dairy.
- Student Mark details for current and previous semesters sent to parents.

Library

- Book, Back volume, Project, Journal details.
- Library in/Out entry.
- Book issue/Return/Renewal
- Fine calculation
- Library related report

Acknowledgement

Success in such a comprehensive project cannot be achieved single-handed. It is the team effort that sails the ship to the coast. So we would like to express our sincere thanks to all the dignitaries who were involved in making this project the great joy and turning it out into the successful piece of work.

I am lifelong indebted to **Mr.G.Dayanand Chairman and Mr.G.D.Manoj Executive Director** for providing us the environment that is best suited for outgrowth of this staffs' personality and bringing up there moral. They are insinuations will help us while I will be facing the profession world. They are the person who has given the direction to our work and the shapes to our imagination. I express our regards to them from the core of our heart.

They provided very friendly environment in the institute so that I have been able to work at extreme level with my best efforts. Their uncompromising demand for quality and instance for meeting the deadlines. They motivated to complete the work before time achieves excellence in whatever I did.

I am also like to thank our **all the Professors** who are help to me. They are the persons who give solutions whenever needed. They all are also a part of my success of this program.

I would also like to acknowledge all the **friends, colleagues and family members** for the help and encouragement by them from time to time. The constant support and encouragement of my friends is deeply appreciated. The Sapthagiri.org.in Website indeed gave challenging and exhilarating experience in designing and developing the required system.

Thanking all

Assistant Professor
Department Of CSE

Preface

“If you have one apple and I have one apple and if we exchange it then we both have remaining one apple but if I have one good thought and you have one good thought and if we exchange it then we both remaining two thoughts....so spread your knowledge..!!! “

- Swami Vivekananda

With great pleasure I undertake the writing of document for **"SAPTHAGIRI.ORG.IN"** because it is a fact to proud of that I am the Faculty of **Department of Computer Science and Engineering, SAPTHAGIRI COLLEGE OF ENGINEERING.**

As a Faculty of computer field, I must be encouraged by the growth and rapid developments in the software industry. Keeping in mind the ever-increasing demand for software and software engineers the College has arranged for a system development program.

Thus it is our moral and obligatory duty to take this as a part of our work with great enthusiasm and seriousness and give it the due importance. For this I have gone through development program of past Two Years.

Chapter-1

Introduction

- 1.1 Project Profile
- 1.2 Project Introduction
- 1.3 Institution Introduction
- 1.4 Institution Profile

1.1 Website Profile

✂	Project Title	:	Sapthagiri.org.in.
✂	Platform	:	SENTORA.
✂	Back-end (Used)	:	MySQL.
✂	Front-end (Used)	:	JSP,Java Script,CSS,HTML
✂	Web Server	:	Apache Tomcat .
✂	Team Size	:	1.
✂	Development Tools	:	➤ NetBeans 8.0. ➤ MySql Developer . ➤ Wamp Server 2.0.
✂	project Objective	:	Automated process of Sapthagiri Engineering College Official Activities.
✂	Project Duration	:	2 Years.
✂	Guided By	:	Dr.K.L. Shivabasappa , Principal.
✂	Submitted To	:	Sapthagiri College of Engineering, Bangalore.

1.2 Project Introduction

The Sapthagiri.org.in website is useful for the students, staff, parents will receive SMS as Result as well attendance of IAT Exams and Day to Day Status. It provides the facility to the students or parents to have complete information about the college.

This website is very dynamic and very easy to understand, the interface of the website is user friendly, this website can provide all the details about college, courses, subjects, event, news, attendance, result. some important information about fresh news & events.

In this web site designed to perform paperless works around the college and maintain correct data on need to display.

Staff login provided to all staff members so that all can able to login and do their regular activities.

The sapthagiri.org.in website is also very useful because the Chief Superintendent of VTU Examination can prepare the Automated BForm and Room Allotment for Four, Three and Two Column Rooms. To make this website work successfully we have used some latest technology such as JSP as the Development Platform, .JAVA 8 frame work as the development and MySQL Server as the Database Management environment.

A brief description about JSP and MySQL Server are provided into the documentation in technology used for front-end and back-end instruction.

All the covered commitments and provided utilities are described in the proposed system.

The UML Diagram has been drawn which is useful to display the flow of the Process throughout the system so even an All people can easily get idea of the proposed system.

The “Testing” technique that we have followed is up to grade and it’s helpful in easily finding the error or bugs. Testing is a process necessary to be conducted by analyst to have the system build error-less. Testing is important for consistency purposes that is user cannot access beyond its limitation.

1.3 Institution Introduction

- Saphthagiri College of Engineering, Bangalore popularly known as SCE is the brain child of the well known industrialist and philanthropist Mr. G. Dayanand, the Chairman of the Governing Board of the College. SCE is a self-financed Institution approved by AICTE, affiliated to Visvesvaraya Technological University. The college offers 7 UG courses and 2 PG Courses with an annual intake of 1068 students. The over all students strength of the college is 3000.
- SCE is located in North Bangalore on the Hesaraghatta road in spacious serene and invigorating surroundings, far from the maddening crowd and the hustle and bustle of the urban locale. The lush green campus provides an ideal and congenial atmosphere to pursue education without any external distractions like noise, sound and air pollution.

Facilities :-

- Library
- Well Equipped Labs
- Auditorium
- Canteen
- Well Furnished Classrooms
- Computer lab
- Projector teaching

1.4 Institution Profile

About “Sapthagiri College of Engineering”

Name : Sapthagiri College of Engineering

Address : Chikkasandra, Bangalore-560057.

Contact No : (080) 28372800/01/02/03

E-Mail : principal@sapthagiri.edu.in

Established Year : 2001

Chairman : Mr.G.Dayanand

Executive Director : Mr.G.D.Manoj

Principal : Dr.K.L.Shivabasappa

Administrative Officer : Dr Nagabhushana K R

Chapter-2

Environment Description

2.1 Hardware and Software Requirement

2.2 Technology Used

2.1 Hardware & Software Requirements

Client Side Tools

▶ Processor	PC with a Pentium IV-class processor, 1 GHz processor Recommended: 1 GHz processor
▶ RAM	1 GB or onwards Recommended.
▶ Hard Disk	50 GB of available space required on system drive of available or more.
▶ Operating System	Windows 7 or later versions
▶ Browser	Mozilla Firefox/Internet Explorer 8.0 Onwards

Server Side Tools

▶ Processor	PC with a Pentium IV-class processor, 1 GHz processor Recommended: 1 GHz processor
▶ RAM	2 GB or onwards Recommended.
▶ Hard Disk	80 GB
▶ Operating System	Windows 8 server, or later versions
▶ Software	MSSQL Server, Visual Studio 2013, JAVA,J2EE
▶ Browser	Mozilla Firefox /Internet Explorer 8.0 Onwards

Development Side Tools

▶ Processor	PC with Inter Core 2 Duo.
▶ RAM	1 GB.
▶ Hard Disk	320 GB.
▶ Operating System	Windows 8.1
▶ Software	MSSQL Server, NetBeans 8.1
▶ Browser	Mozilla Firefox 9.0

2.2 Technology Used

What is JSP?

- ▶ Java Server Page (JSP) is a technology for controlling the content or appearance of Web pages through the use of **servlets**, small programs that are specified in the Web page and run on the Web server to modify the Web page before it is sent to the user who requested it. Sun Microsystems, the developer of **Java**, also refers to the JSP technology as the Servlet application program interface (API). JSP is comparable to Microsoft's Active Server Page (ASP) technology. Whereas a Java Server Page calls a Java program that is executed by the Web server, an Active Server Page contains a **script** that is **interpreted** by a script interpreter (such as **VBScript** or **JScript**) before the page is sent to the user.
- ▶ An HTML page that contains a link to a Java servlet is sometimes given the file name suffix of .JSP.
- ▶ Java Server Pages (JSP) is a server-side programming technology that enables the creation of dynamic, platform-independent method for building Web-based applications. JSP have access to the entire family of Java APIs, including the JDBC API to access enterprise databases. This tutorial will teach you how to use Java Server Pages to develop your web applications in simple and easy steps.

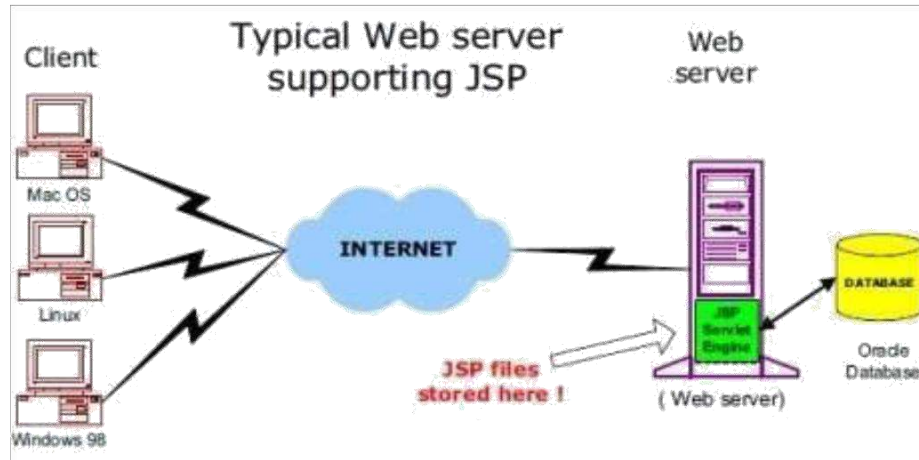

What is JAVA?

- ▶ **Java** is a general-purpose, concurrent, object-oriented, class-based, and the runtime environment(JRE) which consists of **JVM** which is the cornerstone of the Java platform. This blog on **What is Java** will clear all your doubts about why to learn java, features and how it works.

Java has been used in different domains. Some of them are listed below:

- ▶ **Banking:** To deal with transaction management.
- ▶ **Retail:** Billing applications that you see in a store/restaurant are completely written in Java.
- ▶ **Information Technology:** Java is designed to solve implementation dependencies.
- ▶ **Android:** Applications are either written in Java or use Java API.
- ▶ **Financial services:** It is used in server-side applications.
- ▶ **Stock market:** To write algorithms as to which company they should invest in.
- ▶ **Big Data:** Hadoop MapReduce framework is written using Java.
- ▶ **Scientific and Research Community:** To deal with huge amount of data.

JSP Architecture

MySQL Server

1. High Performance

- A unique storage-engine architecture allows database professionals to configure the MySQL database server specifically for particular applications, with the end result being amazing performance results. Whether the intended application is a high-speed transactional processing system or a high-volume web site that services a billion queries a day, MySQL can meet the most demanding performance expectations of any system. With high-speed load utilities, distinctive memory caches, full text indexes, and other performance-enhancing mechanisms, MySQL offers all the right ammunition for today's critical business systems.

2. High Availability

- Rock-solid reliability and constant availability are hallmarks of MySQL, with customers relying on MySQL to guarantee around-the-clock uptime. MySQL offers a variety of high-availability options from high-speed master/slave replication configurations, to specialized Cluster servers offering instant failover, to third party vendors offering unique high-availability solutions for the MySQL database server.

3. Robust Transactional Support

- MySQL offers one of the most powerful transactional database engines on the market. Features include complete ACID (atomic, consistent, isolated, durable) transaction support, unlimited row-level locking, distributed transaction capability, and multi-version transaction support where readers never block writers and vice-versa. Full data integrity is also assured through server-enforced referential integrity, specialized transaction isolation levels, and instant deadlock detection.

4. Web and Data Warehouse Strengths

- ▶ MySQL is the de-facto standard for high-traffic web sites because of its high-performance query engine, tremendously fast data insert capability, and strong support for specialized web functions like fast full text searches. These same strengths also apply to data warehousing environments where MySQL scales up into the terabyte range for either single servers or scale-out architectures. Other features like main memory tables, B-tree and hash indexes, and compressed archive tables that reduce storage requirements by up to eighty-percent make MySQL a strong standout for both web and business intelligence applications.

5. Strong Data Protection

- ▶ Because guarding the data assets of corporations is the number one job of database professionals, MySQL offers exceptional security features that ensure absolute data protection. In terms of database authentication, MySQL provides powerful mechanisms for ensuring only authorized users have entry to the database server, with the ability to block users down to the client machine level being possible. SSH and SSL support are also provided to ensure safe and secure connections. A granular object privilege framework is present so that users only see the data they should, and powerful data encryption and decryption functions ensure that sensitive data is protected from unauthorized viewing. Finally, backup and recovery utilities provided through MySQL and third party software vendors allow for complete logical and physical backup as well as full and point-in-time recovery.

6. Comprehensive Application Development

- ▶ One of the reasons MySQL is the world's most popular open source database is that it provides comprehensive support for every application development need. Within the database, support can be found for stored procedures, triggers, functions, views, cursors, ANSI-standard SQL, and more. For embedded applications, plug-in libraries are available to embed MySQL database support into nearly any application. MySQL also provides connectors and drivers (ODBC, JDBC, etc.) that allow all forms of applications to make use of MySQL as a preferred data management server. It doesn't matter if it's PHP, Perl, Java, Visual Basic, or .NET, MySQL offers application developers everything they need to be successful in building database-driven information systems.

7. Management Ease

- ▶ MySQL offers exceptional quick-start capability with the average time from software download to installation completion being less than fifteen minutes. This rule holds true whether the platform is Microsoft Windows, Linux, Macintosh, or UNIX. Once installed, self-management features like automatic space expansion, auto-restart, and
- ▶ dynamic configuration changes take much of the burden off already overworked database administrators. MySQL also provides a complete suite of graphical management and migration tools that allow a DBA to manage, troubleshoot, and control the operation of many MySQL servers from a single workstation. Many third party software vendor tools are also available for MySQL that handle tasks ranging from data design and ETL, to complete database administration, job management, and performance monitoring.

8. Open Source Freedom and 24 x 7 Support

- ▶ Many corporations are hesitant to fully commit to open source software because they believe they can't get the type of support or professional service safety nets they currently rely on with proprietary software to ensure the overall success of their key applications. The questions of indemnification come up often as well. These worries can be put to rest with MySQL as complete around-the-clock support as well as indemnification is available through MySQL Enterprise. MySQL is not a typical open source project as all the software is owned and supported by Oracle, and because of this, a unique cost and support model are available that provides a unique combination of open source freedom and trusted software with support.

9. Lowest Total Cost of Ownership

- ▶ By migrating current database-driven applications to MySQL, or using MySQL for new development projects, corporations are realizing cost savings that many times stretch into seven figures. Accomplished through the use of the MySQL database server and scale-out architectures that utilize low-cost commodity hardware, corporations are finding that they can achieve amazing levels of scalability and performance, all at a cost that is far less than those offered by proprietary and scale-up software vendors. In addition, the reliability and easy maintainability of MySQL means that database administrators don't waste time troubleshooting performance or downtime issues, but instead can concentrate on making a positive impact on higher level tasks that involve the business side of data.

Apache Server

- Apache is developed and maintained by an open community of developers under the auspices of the [Apache Software Foundation](#).

What is the Apache Software Foundation?

- ▶ The Apache Software Foundation (ASF) is a non-profit 501(c)(3) corporation, incorporated in Delaware, USA, in June of 1999. The ASF is a natural outgrowth of The
- ▶ Apache Group, a group of individuals that was initially formed in 1995 to develop the Apache HTTP Server.

Feature of Apache Server

- ▶ Apache supports a variety of features, many implemented as [compiled modules](#) which extend the core functionality. These can range from server-side programming language support to authentication schemes.
Some common language interfaces support [Perl](#), [Python](#), [Perl](#), and [PHP](#).
- ▶ Popular authentication modules include `mod_access`, `mod_auth`, `mod_digest`, and `mod_auth_digest`, the successor to `mod_digest`.
A sample of other features include [SSL](#) and [TLS](#) support (`mod_ssl`), a [proxy module](#) (`mod_proxy`), a URL rewriter (also known as a [rewrite engine](#), implemented under `mod_rewrite`), custom log files (`mod_log_config`), and filtering support (`mod_include` and `mod_ext_filter`).
- ▶ [Virtual hosting](#) allows one Apache installation to serve many different actual websites.
For example, one machine with one Apache installation could simultaneously serve `www.example.com`, `www.test.com`, `test47.test-server.test.com`, etc
- ▶ Apache features configurable error messages, [DBMS](#)-based authentication databases, and [content negotiation](#). It is also supported by several [graphical user interfaces](#) (GUIs).

Performance of Apache Server

- ▶ Although the main design goal of Apache is not to be the "fastest" web server, Apache does have performance comparable to other "high-performance" web servers.

- ▶ Instead of implementing a single architecture, Apache provides a variety of MultiProcessing Modules (MPMs) which allow Apache to run in a process-based, hybrid (process and thread) or event-hybrid mode, to better match the demands of each particular infrastructure.
- ▶ The Apache version considered by the Apache Foundation as providing high-performances is the multi-threaded version which mixes the use of several processes and several threads per process

❖ What are the future plans for Apache ?

- ▶ To continue to be an "open source" no-charge-for-use HTTP server,
- ▶ To keep up with advances in HTTP protocol and web developments in
- ▶ general, To collect suggestions for fixes/improvements from its users,
- ▶ To respond to needs of large volume providers as well as occasional users.

Chapter-3

Existing System

3.1 Introduction to Existing System

3.2 Limitations of the Existing System

3. Existing System

3.1 Introduction of Existing System

In “Sapthagiri.org.in” some work can be done manually but some cannot be done because it is time consuming and cumbersome to do that work. This system works JSP, but some data entry is necessary which cannot be avoided.

Before developing this project all the problems were identified thoroughly and we performed the analysis on existing system.

Before developing “Sapthagiri.org.in”, the existing college work are done manually and its time consuming work.

VTU EXAMCELL:

All the Information's of students are maintained by paper work, which is very difficult and time consuming to maintain and search.

Staff Record:

All the Information of staff is maintained on paper which is not secure..

Result Record:

All Information about result Maintain on excel sheet that information is very difficult to maintain for faculties and difficult to display to students in proper format.

Attendance Record:

All Information about attendance Maintain on excel sheet which required to maintain properly by faculties in authorized manner.

Alumni Record:

All Information about Alumni Maintain on excel sheet that information is very difficult to maintain for faculties and difficult to display to students in proper format.

CMS Record:

All Information about Maintain on excel sheet which required to maintain properly by faculties in authorized manner.

3.2 Drawback of Existing System

- There is no facility to admin side.
- All the pages are static so any changes in any single page need to change the source code and again it has to upload.
- The System does not display subject details as well as course details.
- There is no staff login so faculty cannot analyze and enter own result as well as attendance.
- Parents does not have facility to view their own result and attendance in SMS.
- There no facility to upload excel file for attendance or result.
- No facility for report of the categories at admin side.

Chapter-4

Proposed System

4.1 Scope of System

4.2 Objectives of System

4.3 Constraints

4.4 Expected Advantages

4.1 Scope of System

The “**Sapthagiri.org.in**” is concerned with six categories of modules

1. **Campus Management System(CMS)**
2. **Library**
3. **VTU ExamCell**
4. **Automatic Monitoring Proctor System(AMPS)**
5. **Daily Student Attendance SMS to Parents**
6. **Alumni Data Management**

Aim of System

In The **Sapthagiri.org.in** the Course Detail , Semester Detail, Subject Detail, Exam Detail, Faculty Details, Student Detail, Attendance Detail are managed by the System. This system provides student result, attendance, Day to Day SMS, IAT SMS, college information, Examcell with BForm and Room Allotment etc.

4.2 Objectives of System

Objectives mean the various usages of one system. By clarifying the system objectives one can be much clearer about the processes he/she has to perform. The objectives of our proposed system are:

- ✧ Keep records of all Students, Faculty.
- ✧ Generates quick Result & Attendance of each and every students on Parents No as SMS.
- ✧ Automatic Generate stud id for each every student as well faculty id for each faculty.
- ✧ Save the time and make the work easy for desk user
- ✧ The college will facilitate the holistic development of the child

- ✧ Maintains the whole information about College.
- ✧ Provide the facility like send mail for recover password
- ✧ The system can allow the administrator to select the unnecessary information and delete them from the database. Here administrators have total control on Site; he can delete or edit information.
- ✧ It will easily used and the time consuming is decreased.
- ✧ It can reduce paper work.
- ✧ This system is web-base application, so all people of world can access it from any where.

4.3 Constraints

❖ **The constraint associated in the development of any software system includes those that are common to all system. The common constraints may include lack of managerial participation tighter development schedule etc.**

Some of the constraints are listed below with which we have developed this system

- ✧ admin mistake can be turned into the improper student result & attendance .
- ✧ The links which are contains adults word or information which is suspended by the Admin.
- ✧ The number of links of member will be displayed along with the Links Information and Analytics Information will be held in the member's session object.
- ✧ Admin can upload only CSV file.
- ✧ It requires Wamp server & Mysql and Apache Server.
- ✧ The Staff can only view result & attendance.
- ✧ It requires Microsoft Windows XP service pack and above.
- ✧ It is web-base system, so Internet facility must be continues and require.
- ✧ System performance depends on internet speed.

4.4 Expected Advantages

- ✧ Student parent will receive SMS of Marks and Attendance through SCEBNG as Message name.
- ✧ When faculty is login that time it will display own subject result so faculty can analysis Result & attendance
- ✧ Faculty edit own profile like changes name.
- ✧ Student will view exam schedule & faculty profile.
- ✧ Student obtains information about college like fresh director message.
- ✧ Admin will managed over-all side like uploading result,attendance,exam time table etc
- ✧ Accuracy and security can be maintained easily.
- ✧ It is web-base system so Users use it anywhere and anytime.
- ✧ Administrator can easily change data or information; also it enters and appends the data any time.

Chapter-5

System Planning

5.1 Requirement Specification

5.2 Feasibility Study

5.3 Life Cycle Model

5.4 Effort Distribution Diagram

5.5 Task Dependency

5.6 Timeline Chart

5. System Planning

5.1 Requirement Specification

Before building an elegant application, best way to identify basic needs and functionality is to visit websites relevant to that specific area addressed by proposed application.

For gathering basic needs and functionalities, we had meeting with organization personal to understand requires functionalities also noted down some useful feature to be included. We also referred some articles related to application to understand various functionalities.

- Requirement gathering for project “**Sapthagiri.org.in**” initiated by the study of a past few projects.
- The requirements thus gathered were thereby analysed and thus accomplished the part of requirements gathering and analyses
- We also taken guidance from our college faculties to clear about requirement analyses
- We held several meetings with our project guide to decide the process model and basic system architecture.
- We choose incremental process model as per requirements.
- The current system is that satisfied all users requirement.
- Therefore it is very important to analysed existing system which is provide base for the development and proposed system.

5.2 Feasibility Study

Depending on the results of the initial investigation the survey is now expanded to a more detailed feasibility study. **“FEASIBILITY STUDY”** is a test of system proposal according to its workability, impact of the organization, ability to meet needs and effective use of the resources. It focuses on these major questions:

- ✧ What are the user’s demonstrable needs and how does a candidate system Meet them?
- ✧ What resources are available for given candidate system?
- ✧ What are the likely impacts of the candidate system on the organization?
- ✧ Whether it is worth to solve the problem?

During feasibility analysis for this project, following primary areas of interest are to be considered.

Steps In Feasibility Analysis :

- ✧ Form a project team and appoint a project leader.
- ✧ Prepare system flowcharts.
- ✧ Enumerate potential proposed system.
- ✧ Define and identify characteristics of proposed system.
- ✧ Determine and evaluate performance and cost effective of each proposed system.
- ✧ Weight system performance and cost data.
- ✧ Select the best-proposed system.
- ✧ Prepare and report final project directive to management.

Operational Feasibility

The new system can be beneficial only if it satisfies the organization requirements; in such a way that resource utilization and optimum outcome is justified. A new system should not only be robust but should also be able to work simultaneously with other systems. Operational feasibility means that new system should not affect any existing system during the development phase or even in the implementation phase. Following are some points underlying the operational feasibility of the system- As the development proceeded many doubts got cleared out.

Efforts were made to optimize the human efforts in data collection, storage, retrieval, security and presentation.

The proposed system made best efforts in achieving necessary function and performance, as required by the user and keeping in mind some infrastructure constraints.

Technical Feasibility

Developers of computer- based systems are optimists by nature. During an evaluation of technical feasibility, a cynical, if not pessimistic, attitude should prevail. Misjudgment at this stage can be disastrous.

❖ The technical issues during the analysis generated were....

- ✎ What are the hardware and software requirements for the proposed system was the first major issue of the discussion.
- ✎ Windows XP operating system was used.
- ✎ All hardware support required for the development of the system.
- ✎ So, technically the development of the system was feasible.

Economical Feasibility

Among the most important issues in feasibility study is „cost benefit analysis“, an assessment of the economic justification for a Computer based system project. The cost involved in designing and developing a system should be a good investment for the organization. The financial benefits must be justified by the cost.

❖ The financial and economic issues raised during preliminary investigation are as follows...

- ✎ Cost of conducting system study and investigation is justified since the system development is in-house.
- ✎ There is no extra cost of hardware, as it already exists sufficiently.

Thus, looking towards the advantages of the system and also the system constraints, it seems that it is feasible to develop the system using the existing resources.

When a project is undertaken its economic and financial gains and losses have to be considered i.e. whether the organization can support the cost incurred during the development of the project. This is known as economic feasibility. The tangible and intangible benefits were considered. Taking these factors into consideration a Cost Benefit Analysis was carried out for evaluating the proposed system.

The evaluation was carried out under the following two heads:

Hardware Cost:

The organization already possesses the required hardware and software for the system, so no additional cost will be incurred in implementing the system.

Manpower Cost:

The proposed system is user friendly and does not require much knowledge of computers. Thus there is no requirement of highly qualified staff in computers requiring big amounts of salaries. Thus no extra expenditure is required for manpower. Therefore the system is financially feasible.

Maintenance Cost:

The proposed system is user Maintenance cost machinery cost, employee cost and other cost are include in company costs Maintenance cost etc.....

5.3 Life Cycle Model

❖ Types of Life Cycle model:

- ✧ Prototype Model
- ✧ Waterfall Model
- ✧ Iterative Enhancement Model
- ✧ The Spiral Model
- ✧ Dynamic System Development Model

❖ Prototype Model

The goal of prototyping based development is to counter the first two limitations of the waterfall model discussed earlier. The basic idea here is that instead of freezing the requirements before a design or coding can proceed, a throwaway prototype is built to understand the requirements. This prototype is developed based on the currently known requirements. Development of the prototype obviously undergoes design, coding and testing. But each of these phases is not done very formally or thoroughly. By using this prototype, the client can get an "actual feel" of the system, since the interactions with prototype can enable the client to better understand the requirements of the desired system.

Iterative Enhancement Model

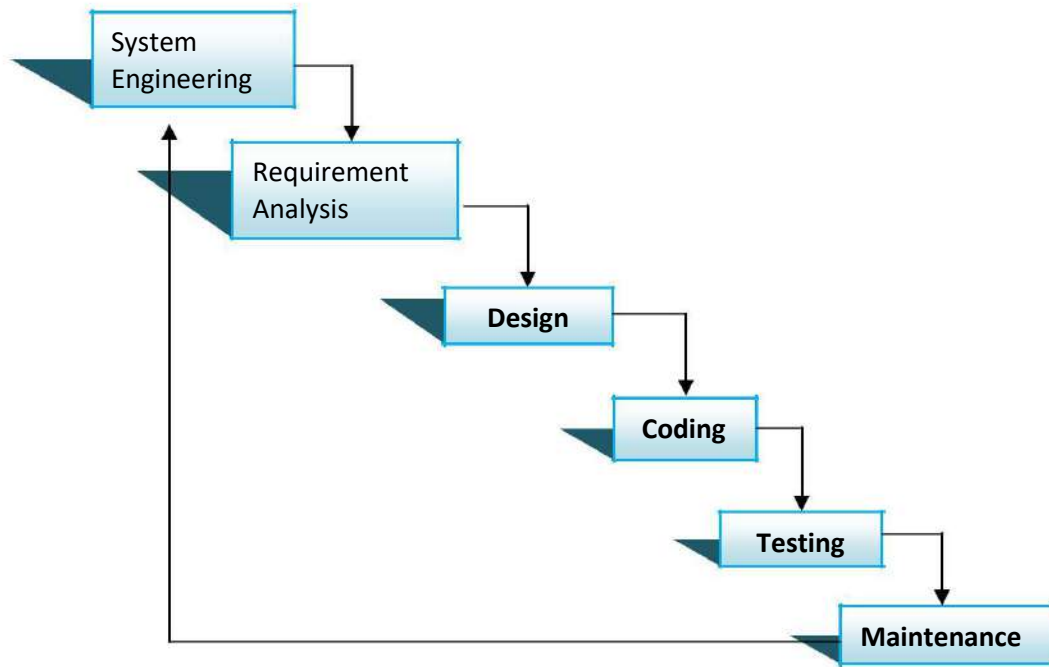

The iterative enhancement life cycle model counters the third limitation of the waterfall model and tries to combine the benefits of both prototyping and the waterfall model. The basic idea is that the software should be developed in increments, where each increment adds some functional capability to the system until the full system is implemented. At each step extensions and design modifications can be made. An advantage of this approach is that it can result in better testing, since testing each increment is likely to be easier than testing entire system like in the waterfall model. Furthermore, as in prototyping, the increments provide feedback to the client which is useful for determining the final requirements of the system.

Spiral Model

This is a recent model that has been proposed by Boehm. As the name suggests, the activities in this model can be organized like a spiral. The spiral has many cycles. The radial dimension represents the cumulative cost incurred in accomplishing the steps done so far and the angular dimension represents the progress made in completing each cycle of the spiral. The structure of the spiral model is shown in the figure given below. Each cycle in the spiral begins with the identification of objectives for that cycle and the different alternatives are possible for achieving the objectives and the imposed constraints.

Waterfall Model

We have followed “**Waterfall model**” for software engineering. This method suggests a systematic, sequential approach to software development that being at the system level and progress through analysis, design, coding, testing and maintenance. This model is also called “**Linear Sequential Model**” as one have to follow all the above five stages sequentially. Also called the “**Classic Life Cycle**” is the oldest and the most widely used paradigm for Software Engineering.

Reason for selecting this model

If all the five stages mentioned above are followed sequentially than one may able to prepare the efficient software.

It is general practice to do complex analysis and review core functionality before actual coding and testing.

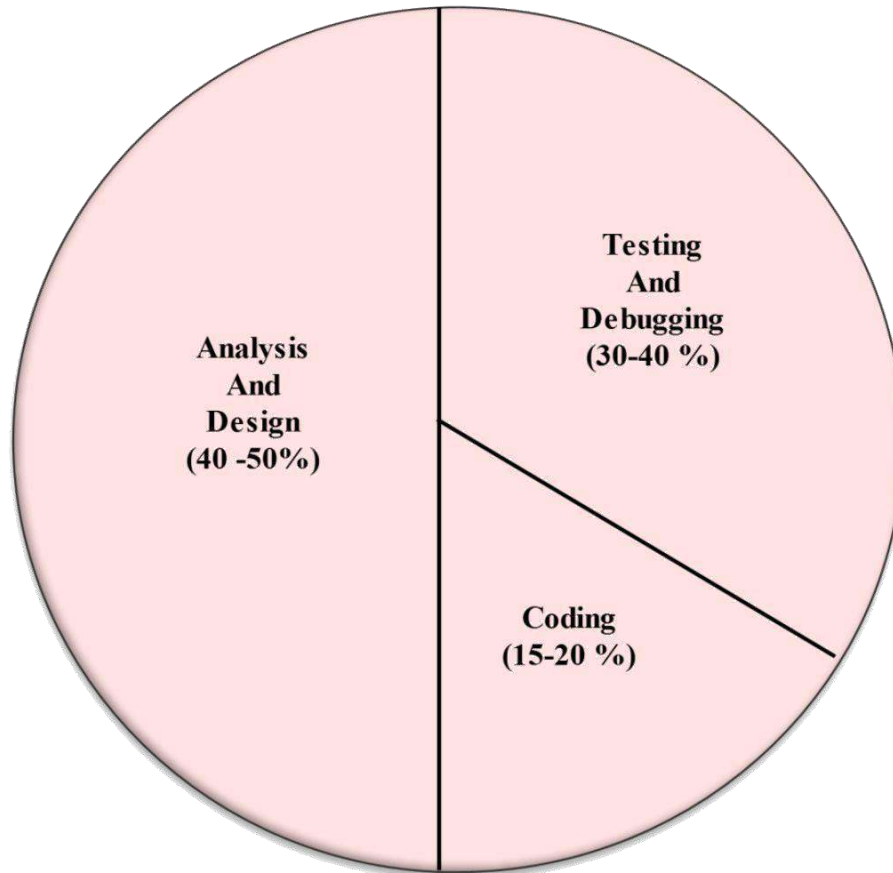

On starting we have specify maintain only employee

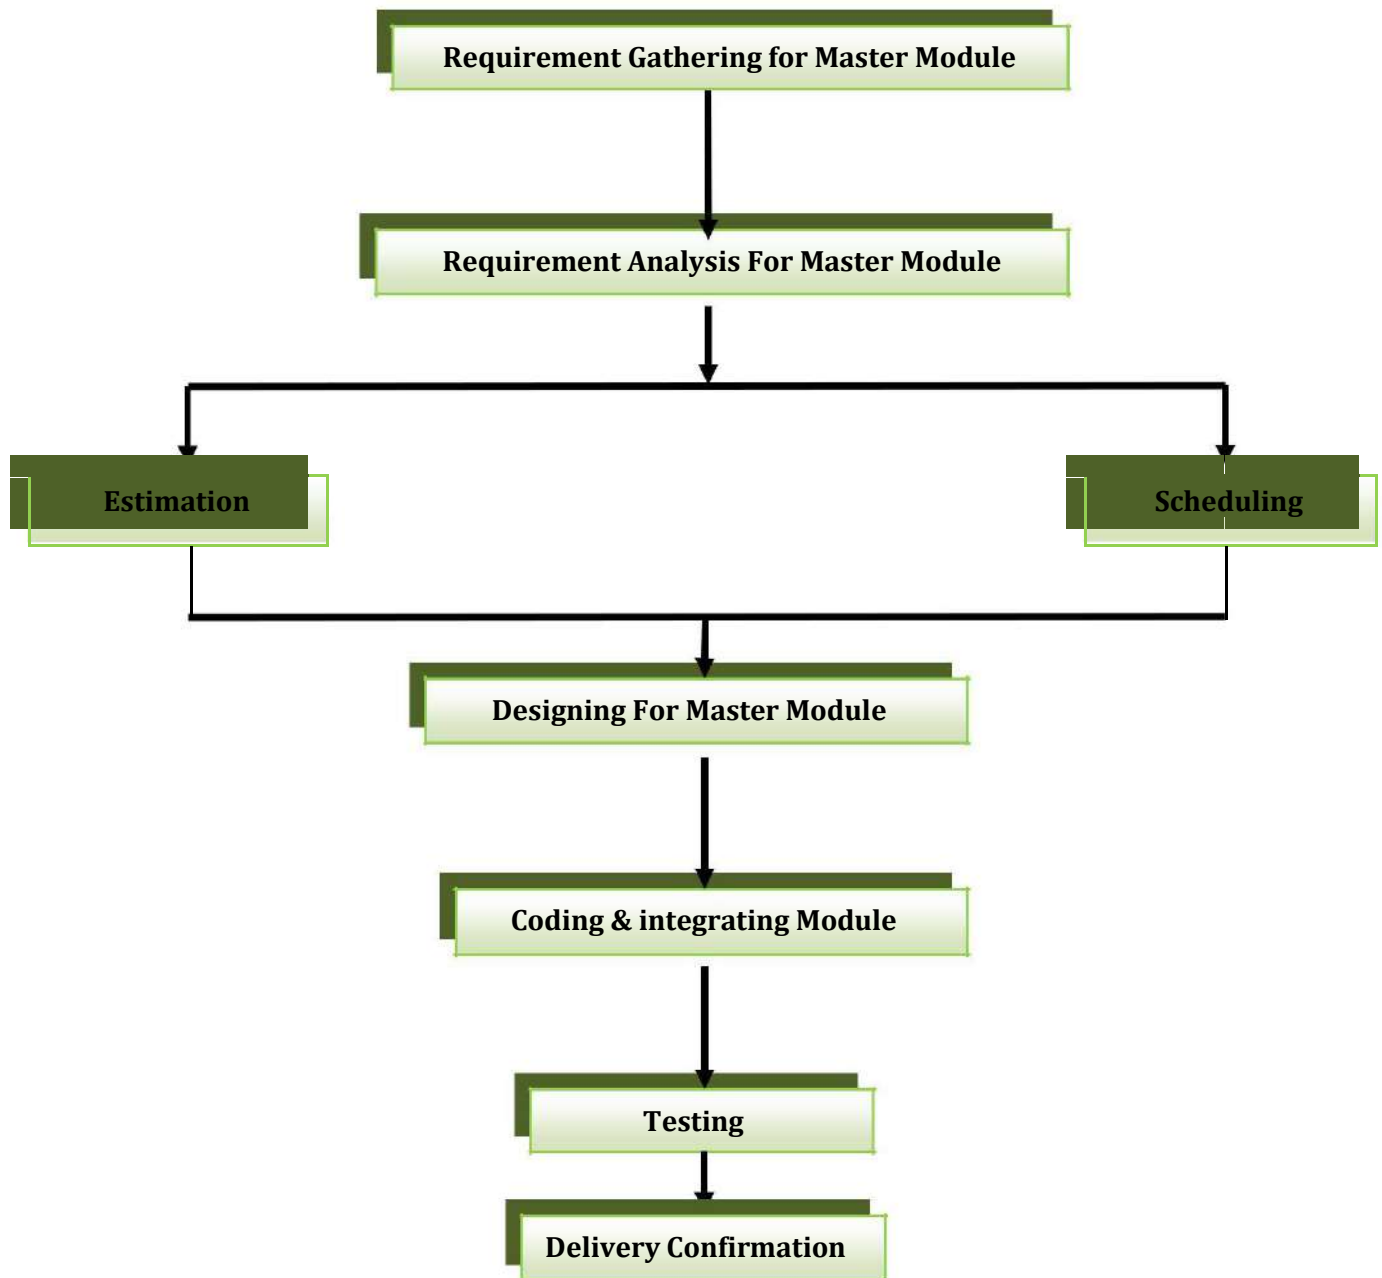

After one month the requirement for the remaining module was given. So, the same steps has to repeat so we need to **move back to start from analysis** stack & that is the main reason to use waterfall model.

5.4 Effort Distribution Diagram

Project Planning	: 2 To 3%

Chapter-7

Software Testing

7.1 Testing Introduction.

7.2 Test Case.

7. Software Testing

Software Testing :

Software testing is a critical element of software quality assurance and represents the ultimate review of specification design and coding. Testing is an exposure of a system to trial input to see whether software meets correct output. Testing cannot be determined whether software meets user's needs, only whether it appears to confirm to requirements. Testing can show that a system is free of errors, only that it contains error. Testing finds errors, it does not correct errors. Software success is a quality product, on time and within cost. Through testing can reveal critical mistakes. Testing should therefore,

Validate Performance

Detects Errors

Identify Inconsistencies

Test Objective :

There is strong evidence that effective requirement management leads to overall project cost savings. The three primary reasons for this are,

- Requirement errors typically cost well over 10 times more to repair than other errors.
- Requirement errors typically comprise over 40% of all errors in a software project.
- Small reduction in the number of requirement errors pays big dividend in avoided rework costs and schedule delays.

System are not designed as entire systems nor are they tested as single systems the analyst must perform both unit and system testing. For this different level testing are use:

Unit Testing :

In unit testing Module is tested separately and the programmer simultaneously along with the coding of the module performs it.

In unit testing the analyst tests the programs making up a system. For this reason, unit testing is sometime called program testing. Unit testing gives stress on modules independently of one another, to find errors. This helps the tester in detecting errors in coding and logic that are contained within that module alone. The errors resulting from the interaction between modules are initially avoided.

Unit testing can be performed from the bottom up, Starting with smallest and lowest-level modules and proceeding one at a time., for each module in Bottom-up testing a short program is used to execute the module and provides the needed data, so that the module is asked to perform the way it will when embedded within the larger system.

System Testing :

This is performed after the system is put together. The system is tested against the system requirement to check if all the requirements are met and if the system performs of specify by the requirements.

Testing is an important function to the success of the system. System testing makes a logical assumption that if all the parts of the system are correct, the goal will be successfully activated. Another reason for system testing is its utility as a user-oriented vehicle before implementation.

System Testing Consists of Following Five Steps :

1. Program Testing :

A program represents the logical elements of a system. For a program to run satisfactorily, it must compile and test data correctly and tie in properly with other programs. It is the responsibility of a programmer to have an error free program. At the time of testing the system, there exist two types of errors that should be checked. These errors are

- a) Syntax error
- b) Logic error

- A syntax error is a program statement that violates one or more rules of the language in which it is written. An improperly defined field dimension or omitted key words are common syntax errors. These errors are shown through error messages generated by the Computer.
- A logic error, on the other hand, deals with incorrect data fields out of range items, and invalid combinations. Since the logical errors are not detected by compile, the programmer must examine the output carefully to detect them.
- When program is tested, the actual output is compared with the expected output. When there is a discrepancy, the sequence of the instructions, must be traced to determine the problem. Breaking the program down into self- contained portion, each of which can be checked at certain key points, facilitates the process.

2. String Testing :

- Programs are invariably related to one another and interact in total system. Each program is tested to see whether it confirms to related programs in the system. Each part of the system is tested against the entire module with both test and live data before the whole system is ready to be tested.

3. System Testing :

- System testing is designed to uncover weaknesses that were not found in earlier tests. This includes forced system failure and validation of total system, as its user in the operational environment will implement it. Under this testing, generally we take low volumes of transactions based on live data. This volume is increased until the maximum level for each transaction type is related. The total system is also tested for recovery and fall back after various major failures to ensure that no data are lost during the emergency.

User Acceptance Testing :

An acceptance test has the objective of selling the user on the validity and reliability of the system. It verifies that the system's procedures operate to system specifications and that the integrity of important data is maintained. Performance of and acceptance of the system.

After that a comprehensive test report is prepared. This report shows the system's tolerance, performance range, error rate and accuracy.

Acceptance Testing :

Finally the acceptance testing is performed to demonstrate the system to the client on the real life data of the client and on the operating system used by the client testing is an externally critical and time consuming activity it requires proper planning the process starts with a test plan that must be performed and specifies guide line for testing then for different unit the test case specification document is produced in which list of all different test cases with expected outputs are put together during testing the specified test cases are executed and actual results are compared with expected output the final output of the testing phases is the test report and error report.

Chapter-8

Limitations and System Enhancement

8.Limitation & System Enhancement

❖ Limitations :

Each and every system has some limitations that can restrict then to work on a particular environment. Through our system is provided high amount of accuracy and quick data generation there is still some limitations that led us to in greater deficiency to work on that system. Some of the limitation that is observed during all the process is mentioned below

- ✓ This system requires knowledgeable person to use this system.
- ✓ The system is not cover the online fees collection.
- ✓ This system doesn't provide library management.
- ✓ The system is web-base application (website) so internet facility must be need.
- ✓ This system is a web-base system so it may slow when more users accessing same interface at same time.
- ✓ For data storage large number of memory covered by system on web.
- ✓ User does not view topper of that college.
- ✓ This system is not cover online admission.
- ✓ This system does not cover to pay staff salary.

❖ Enhancements :

- ✎ In future our system can include Online Accounting System, Good Backup and Restore Facility.
- ✎ System is so much flexible so in future it can increase easily and new modules can be added easily.
- ✎ You can add online student admission as well pay online fees.
- ✎ In future you can add new module like library management system.

CAMPUS MANAGEMENT SYSTEM (CMS)

CMS

Sapthagiri College of Engineering, Bangalore popularly known as SCE is the brain child of the well known industrialist and philanthropist Shri.Mr. G. Dayanand, the Chairman of the Governing Board of the College. SCE is a self-financed Institution approved by AICTE, affiliated to Visvesvaraya Technological University. The college offers 7 UG courses and 2 PG Courses with an annual intake of 1068 students. The over all students strength of the college is 3000.

SCE is located in North Bangalore on the Hesaraghatta road in spacious serene and invigorating surroundings, far from the maddening crowd and the hustle and bustle of the urban locale. The lush green campus provides an ideal and congenial atmosphere to pursue education without any external distractions like noise, sound and air pollution.

Vision & Mission The vision of the institution is to create and maintain an enabling learning environment for the students to transform them as thorough professionals to meet diverse professional demands of global environments. The mission of the institution is to provide quality education to the students to pursue courses in different engineering disciplines and to transform their professional dreams into reality and to offer competent budding professionals to the society.

Our system of education is not directly concerned with changing the political and economic conditions which are responsible for the war but it is our duty to propagate right ideals. If men make history, ideals make men.

[Read more](#)

Sapthagiri College of Engineering, Bangalore, Karnataka state is one such example. SCE stands on the strong edifice of Sri Srinivasa education and charitable trust under the guidance of its founder chairman late Sri T.Giriappa instituted during the year 2001. The institute is situated amongst the lush green ambience and has a vision of "Integral development of students and empowering them for social transformation". And mission "To provide facilities for academic excellence, training in soft skills and technical skills and job placement". The institute has played a significant role in all round development of young engineers in addition to bridging of the gap between all levels of education; the institute has a greater responsibility of making the student fraternity to meet the national and global demands.

26 JUL 2021

CIRCULAR

Sub: Conduct of UG/PG Practical and UG Project Viva-Voce Examination July / August 2021- reg.

The Principals of Constituent and Affiliated Engineering Colleges are requested to note the following in respect of Conduct of **UG/PG** Practical Examinations July/August 2021 and **UG Project Viva-Voce Examination**.

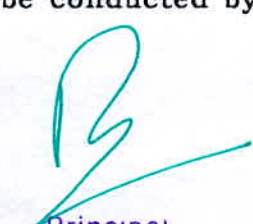

SCHEDULES:

Programs	Uploading Batch by the departments and approval of batches by the Principals	Allocation of Examiners by the Principals of Respective Institutions	Schedule of Examinations
• I/II Sem. UG	27.07.2021 to 29.07.2021	30.07.2021 to 31.07.2021	04.08.2021 to 13.08.2021
• I Sem. PG M.Tech. and MCA	27.07.2021 to 29.07.2021	30.07.2021 to 31.07.2021	07.08.2021 to 12.08.2021
• 7 th and 8 th Sem. B.E./B.Tech./B.Plan. (2015 and 2017 schemes)	27.07.2021 to 29.07.2021	30.07.2021 to 31.07.2021	07.08.2021 to 12.08.2021
• 7 th and 8 th Sem. B.E./B.Tech./B.Plan. (2015 and 2017 schemes) VIVA-VOCE	27.07.2021 to 29.07.2021	30.07.2021 to 31.07.2021	07.08.2021 to 12.08.2021
• 3 rd to 5 th Semester MCA (only backlogs).	27.07.2021 to 29.07.2021	30.07.2021 to 31.07.2021	07.08.2021 to 12.08.2021

NOTE:

1. Due to existence of Covid-19 protocols, the Practical/Viva Examinations for July/August 2021 Examinations are to be conducted by the BOTH EXAMINERS from the same college.

Page 1 of 3

Principal

Sapthagiri College of Engineering
Chikkasandra, Hesaraghatta Road
Bangalore- 560 057

2. Colleges are permitted to conduct the Practical / Viva Examinations with Internal examiner from the college and external examiner from a different college only in case where suitable internal examiner is not available.
3. The examiner allotment and change, if required, must to be done by the Principals.
4. The Appointment order, if not available through web interface on or before the scheduled date, the examiner may download the appointment order, when available and attach the same with the remuneration bill.
5. The Principals must ensure that the examinations are conducted smoothly.

Creation of Practical Batches:

1. The department/branch in which student is studying shall create batches for all their students. This includes students of first year belonging to a branch.
2. The teaching department which conducts the practical exam has access to the batches created for the subjects taught by their department.
3. The teaching department can combine batches or move students of one batch to another if required.

Example:

Computer Science and Engineering department has created 6 batches in Physics subject with the 6th batch having 4 students.

Mechanical Engineering department has created 8 batches in Physics subject with 8th batch having 3 students.

In the above circumstance, the teaching department, namely, Physics department shall move students from one batch to the other and leave one batch empty.

Likewise all teaching departments must take care of all their respective subject labs and minimize the number of batches

4. After moving the students from one batch to another and minimizing the number of batches the dates for batches are to be assigned by the respective teaching department.
5. After the above activity, the Principal has to approve batches.

ROLES AND RESPONSIBILITIES:

Heads of Departments:

Creation of Batches for all practical subjects and other subjects for which examinations are to be conducted batch-wise, by using department login at:

<https://labexam.vtu.ac.in>

Change of batch for student before examiner appointment can be done by the department.

Principal

Sapthagiri College of Engineering
Chikkasandra, Hesaraghatta Road
Bangalore-560 057

2

Principals of Institutions:

- Approval of uploaded batch lists and allotment of Examiners.
- List of faculty assigned with the responsibilities of practical examination duties are available in Principal Login at <https://labexam.vtu.ac.in>, Principals of respective institutions are requested to instruct the concerned faculty to download their appointment orders from. <https://labexam.vtu.ac.in>
- **Faculty Members Appointed as Examiners:** Download their appointment orders from <https://labexam.vtu.ac.in> and attend the duties assigned to them without fail. In case the appointment orders are not available to download, the faculty appointed may conduct the examinations with the approval of the Principal. The Principals may issue a temporary appointment order

For other practical examinations the procedure for marks entry remains the same as in previous examinations, with the exception that examiners are appointed as per this circular.

Detailed instructions for the submission of batch lists and workflow is given in the user manual displayed with the application.

For any queries and clarifications please contact: 0831-2498254 and 2498130, or send an email to prexam@vtu.ac.in.

The contents of this circular must be brought to the notice of all the concerned.

**Sub: Submission of List of Shortage of Attendance for
I Sem. B.E./B.Tech./B.Arch. 2021 - reg.**

The Principals of affiliated Engineering & Architecture colleges are requested to submit the list of students having shortage of attendance through web interface in respect of the I Semester B.E. / B.Tech./B.Arch. 2021. After submission of list through web interface, a printout shall be taken and submitted to the office of the undersigned as per the schedule given below:

Shortage of Attendance Submission

Shortage of Attendance Submission

Semester and Program	Last day of reckoning attendance	Online Submission		Printout Submission
		Starting date	Last date	
➤ I Sem. B.E. / B.Tech./B.Arch.	10.04.2021	16.04.2021	17.04.2021	19.04.2021
Hall tickets will be generated on 17.04.2021				

PLEASE NOTE:

The students should possess 85% of attendance considering

- Both online and offline class attendance
- During online classes, attendance for the students who have faced *technical glitches* and network problems shall be considered for the award of attendance.

However, there is a provision for condonation of attendance to the extent of 10% on the specific recommendations of the Principal as per regulations.

The **CANDIDATES**

- ❖ Having shortage of attendance
- ❖ Detained due to Malpractice
- ❖ Coming under NFTC

ARE NOT ELIGIBLE TO ATTEND THE EXAMINATIONS.

The Principals are requested to withhold the admission tickets of such not eligible candidates and NOT to permit them to take examinations.

Sub: Submission of CIE Marks in respect of I semester 2020-2021- reg.

Ref: No.VTU/BGM/Reg(E)/PS/2020-2021/1233, dated 11.02.2021

The Principals of Constituent / Affiliated Engineering Colleges are requested to make arrangements for the submission of CIE Marks in respect of I semester B.E./B.Tech./B.Arch 2020-2021 through online web portal.

Prerequisites for the submission of CIE marks

1. Faculty mapping must be done in the CIE portal through department login.
2. The status of the faculty in faculty portal must be **"ACTIVE"** and must be **"APPROVED"** by the College Principal.
3. For the faculty who are inactive or have joined recently, a request has to be raised in the department login and Principal needs to approve the same in his/her login. Please do this in the faculty portal, <https://prexam.vtu.ac.in> (select **Faculty Registration** link)

Procedure for the submission of CIE marks

1. URL: <https://iamarks.vtu.ac.in> - for all regions.
2. Choose **CIE marks UG** menu.
3. Departmental Login for CIE Marks Entry - use departmental login Id and password
4. Principal Login - use principal login credentials.
5. The instructions for the submission of CIE marks are already available in the website. Kindly follow the same.

Schedule for submission of IA/CIE Marks

Semester	Schedule		
	Online submission	Hardcopy print of IA marks (scheme and semester wise)	Submission of printouts to ROs

CIRCULAR

**Sub: Submission of CIE / Internal Assessment Marks in respect of
Even semester 2020-2021- reg.**

The Principals of Constituent / Affiliated Engineering Colleges are requested to make arrangements for the submission of CIE/ Internal Assessment Marks in respect of Even semester 2020-2021 through online web portal as per the schedule given here under:

Schedule for submission of CIE/IA (Internal Assessment) Marks

Sl. No.	Semester	Schedule		
		Online submission	Hardcopy print of IA marks (scheme and semester wise)	Submission of printouts to ROs
1	> II Semester B.E./B.Tech./ B.Plan.	27/09/2021 to 01/10/2021	05/10/2021	07/10/2021

Important Points to be noted

1. Please verify the Regulations, Scheme of Teaching and Examinations, before entering the CIE Marks.
2. CIE/Internal Assessment Marks of above even semester students must be entered.
3. In the case of a student who has completed the class work with satisfactory attendance and secured CIE/Internal Assessment Marks and **not applied for examinations, the CIE/ Internal Assessments marks must be submitted without fail. For making available the USN, ticket for USN addition is to be raised.**
4. Please verify the students, who have taken readmission to the even semester.
5. If any candidate has applied for the Improvement of Internal Assessment marks and eligible for taking improvement, such marks are also to be submitted without fail. This has to be entered in Additional CIE/IA marks entry.
6. The faculty must take a draft printout of the entered marks before freezing.

To
All the Principals
of Bangalore

Sapthagiri College of Engineering
Chikkasandra, Hosaraghatta Road
Bangalore-560 057

13

7. Once the Principal approval is completed, the marks submitted will be considered as final.
8. After the freezing of marks by Principal, if the college finds the need to modify the marks, the appropriate ticket is to be raised.
9. Verify the entered marks before finalizing. **NO CORRECTIONS WILL BE ENTERTAINED.**
10. Submit the printouts (hard copies) of CIE/IA marks with the signature of the concerned faculty, Head of the Department and Principal to the respective Regional Offices on or before the last dates without fail.
11. In the case of missing USNs in the list displayed for entering CIE/IA marks, tickets can be raised. The raised tickets will be verified and necessary action will be taken in resolving issues.

Prerequisites for the submission of CIE / IA marks

1. Faculty mapping must be done in the CIE/IA portal through department login.
2. The status of the faculty in faculty portal must be **"ACTIVE"** and must be **"APPROVED"** by the College Principal.

Procedure for the submission of CIE / IA marks

1. URL: <https://iamarks.vtu.ac.in> - for all regions.
2. Choose **CIE marks UG for UG Programs** menu.
3. Departmental Login for CIE/IA Marks Entry - use departmental login Id and password
4. Principal Login - use principal login credentials.
5. The instructions for the submission of CIE/IA marks are already available in the website. Kindly follow the same.

The Principals of constituent and affiliated engineering colleges are requested to bring the contents of this circular to the notice of all the concerned.
