## **World No Tobacco Day 2021**

This day is celebrated to spread awareness about tobacco's harmful effects. This is no news that tobacco is extremely harmful for health and there are 5 million people who lose their lives due to tobacco every year. Today on World No Tobacco Day 2021 people take a step to spread awareness on the danger of tobacco and what ways this substance can harm one's system. The day is annually observed on May 31<sup>st</sup> and was started by the World Health Organization.

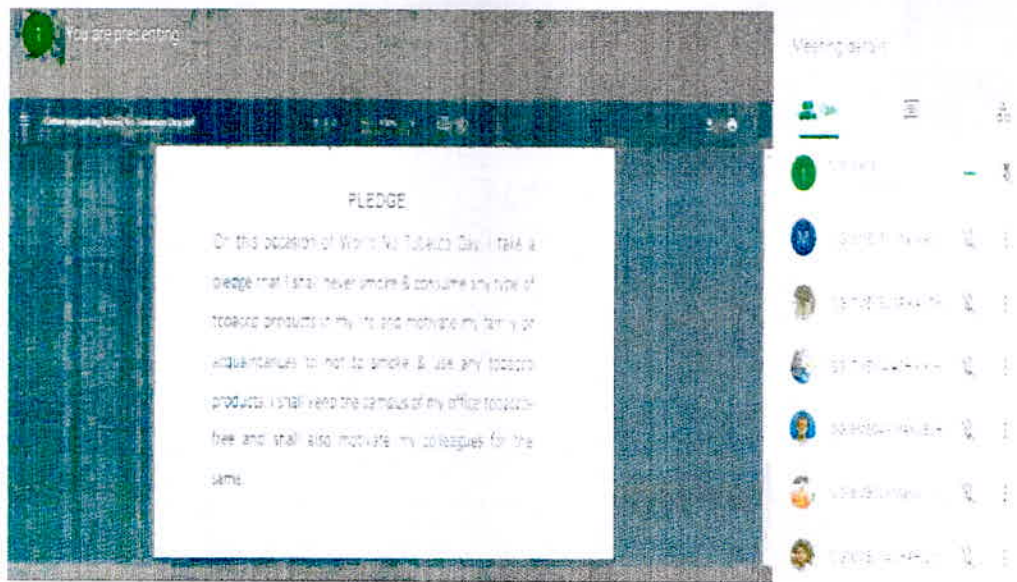

According to WHO, 50 per cent of smokers are more at risk of contracting COVID-19 than non-smokers. "So quitting is the best thing they can do to lower their risk from corona virus, as well as the risk of developing cancers, heart diseases and respiratory illnesses," WHO statement added. On this day, WHO organises exhibitions or activities in school and colleges to spread awareness. This year the theme of this special day is "Commit to Quit".

National Service Scheme (SWAYAM SEVA) NSS UNIT of Sapthagiri College of Engineering in association with ECO club and Health club organized Virtual mode of awareness to students and taking pledge on NO Tobacco Day on 31st May 2021. The program started with welcome speech by NSS Coordinator Dr. Tulsidas D. and pledge taking by the students which was cordially supported by the management, Principal Dr. H Ramakrishna, SCE, Bengaluru

## **Drug Awareness and Prevention for healthy Society**

Drug is any substance (with the exception of food and water) which, when taken into the body, alters the body's function either physically and/or psychologically. Drugs may be legal (e.g. alcohol, caffeine and tobacco) or illegal (e.g. cannabis, ecstasy, cocaine and heroin). Drug (substance) abuse has become a worldwide menace. No part of the world is free from the curse of drug addiction. Drug abuse has emerged as a serious concern, adversely affecting the physical and socio-economic well-being of the country. It has enormous presence on public health across various sections of society. The epidemic of drug abuse in younger generation has assumed alarming dimensions in India. The stress and strain of the modern-day life has rendered the individual more vulnerable to the problem of substance abuse. Addiction to alcohol/drugs not only affects the individual involved, but also the family and society at large.

She predicted that percentage of drug consumption among youth in Karnataka might increase in future and might also surpass Punjab state in future. She requested us to concentrate only on good and useful things to improve our health and life. She stated that first twenty/twenty-five years of a person's life should be used to build his career which will provide him/her every necessity till their life end. She also warned about circulation of LSD stipes and tablets, cocaine, ganjas, etc. around us and remain away from all these for a better and meaningful life. Before she exited webinar, Dr. Tulsidas proudly said that there were no such cases related to drugs around our college till today. Later DR. Gundappa devikeri presented a ppt which informed us about drug abuse, it's reasons, preventive measures etc. He clarified that happiness, illusions, excitement by consumption of drugs are nothing but a myth and no good thing will occur by doing so. It was very sad to know that even school students and teenagers are going step ahead of becoming drug addicts by consuming thinner or whitener either through mouth or nostrils.
