**Report on Mathru Bhasha Divas 2022**

This is a report on “Mathru Bhasha Divas” which was conducted on 18/02/2022 in Sapthagiri College of Engineering. The first language a baby learns from birth is called the mother language, and therefore plays a crucial role in our lives for various reasons. Studies have shown that cognitive development and intellectual development are comparatively faster in fluent in their mother tongue. The educational success in their mother tongue is higher than someone taught in a language other than their mother tongue. Languages are the primary means of keeping our culture alive. Often, the direct translation of one language into another cannot convey the same essence as in the source language. Therefore, the best way to know a culture thoroughly is to understand the language. The mother tongue helps us stay connected to our traditional, cultural values and our roots. If a child reads in their mother tongue from an early age, they will have more substantial reading and writing skills in other languages. Knowing your mother tongue to communicate with your local customers if you want to become an entrepreneur is beneficial. It enriches one’s confidence and creates awareness in one’s mind while also connecting with his cultural identity. Mother’s tongue has a tremendous positive impact on an individual’s personality; however, the medium of education, usually English, also encourages parents to speak to their children in the second language. This leads to confusion in the children’s minds and, hence, difficulties mastering first and second languages.

The following are the details of the activities and respective faculty coordinators, performed on the occasion of Mathru Bhasha Divas.

Sl. No.	Activity	Faculty In charge	Department
