### MATHRU BHASHA DIVAS

The first language a baby learns from birth is called the mother language, and therefore plays a crucial role in our lives for various reasons. Studies have shown that cognitive development and intellectual development are comparatively faster in fluent in their mother tongue. The educational success in their mother tongue is higher than someone taught in a language other than their mother tongue. Languages are the primary means of keeping our culture alive. Often, the direct translation of one language into another cannot convey the same essence as in the source language. Therefore, the best way to know a culture thoroughly is to understand the language.

"Mathru Bhasha Divas" was conducted on 21/02/2022 in Sapthagiri College of Engineering. Various activities like painting, sketching, essay writing, poetry, singing are conducted for the students.
