## Report

Library and Information Centre has organized a Lecture on "India: Mother of Democracy" on 26 November 2022. Librarian was convener of the programme as well as the speaker. Librarian has given the information regarding Indian constitution and its value in present scenario. India is a diverse nation with different religions, languages, and cultures, and all Indians are connected by strong democratic values.

Which is celebrated as Constitution Day in India; it was on this day in 1949 when the constituent Assembly chaired by B.R. Ambedkar adopted the Constitution of India. All over the India today, all the universities and institutions has organizing lectures. Democracy in India, as elsewhere, is not just about periodic elections, nor about voter turnouts, nor about oratory. The central objective of democracy is to enable every person to have a say in deciding about the greater collective social worth.

India's government is loosely modeled on the British Westminster system. It consists of a president as head of state; an executive headed by the prime minister; a legislature consisting of a parliament with an upper and lower house (the Rajya Sabha and Lok Sabha); and a judiciary with a supreme court at its head. 543 members are elected to the Lok Sabha through a first-past-the-post general election, held every five years. State representatives are indirectly elected to the Rajya Sabha on staggered six–year terms, so every two years around one-third are changed, elected by state legislatures.

India's constitution sets out the country's political code, federal structure, powers of government and guarantees Indians' rights, including to equality before the law and freedoms of speech, assembly, movement and others. India's constitution banned caste discrimination and early governments introduced quotas to provide fairer allocation of jobs and education, but caste remains a powerful factor in politics. In some regions political parties still court voters according to castes, who tend to vote as a block. Perhaps the greatest challenge democracy faces in India is that is has failed to deliver the kind of sustained economic development enjoyed by neighbor's like China over the last four decades. It has also failed to eliminate extreme poverty.

Educated elites in more globalized cities like Delhi and Mumbai live completely different lives from India's poorest citizens. Along with that speaker has given lots of information on Constitution, people those who are scarified their life for Indian independence. After gaining independence from Britain in 1947, the government was initially dominated by the Indian National Congress Party ('Congress'). The party was heavily identified with independence leader, Mahatma Gandhi, who was assassinated by a Hindu nationalist in 1948. Jawaharlal Nehru was prime minister from independence and served for 17 years. Congress' electoral dominance would last for the next four decades.

The programme was running up to 11.15 am. Librarian has thanked for gathering after the programme.

Thank you.
