- Spread 1 inch layer of My Green Microbes at the bottom of the bin. Vegetable peels & Fruit waste (avoid Citrus fruits) all to be chopped to small pieces and added to the bin upto 3" to 4" height only. If the waste are added as big chunks the Microbes will not act at its full strength and maggots may be generated.
- The leftover food in the plastic bags not to be added directly, only leftover food to be added & plastic bags removed compulsorily. Do not add any liquid items in the bin.
- The dry leaves from the garden can be added, after adding composter above waste only.
- Spread ½ inch of composter above the waste necessary to cover the waste totally.
- Now again add 4" of waste and add ½ inch of composters regularly till the bin is filled (approx. 30 days).
- After using the bin, from the 10th day, liquid manure (Compost Tea) will be available from the tap provided in the lower chamber. The compost tea to be removed mandatorily from the 10th day & thereafter after every 2 to 3 days.
- The bio bin is designed to collect compost tea separately at lots of friendly microbes. This can be diluted with water @ 1:10 ratio and sprayed on to plants acts as bio booster and pest repellent.
- Once the first composter is full, it has to be closed & kept undisturbed for 15 days. On the 16th day remove the top dry layer (around 10-12 inches) into the empty microbes bag where further curing happens. Repeat this every alternate day. By the next 10-15 day the whole compost can be transferred into the bags emptying the composter for the next cycle. After 15 days the compost can be used to nourish the soil also it can be used as Planting Media. The rich organic manure can be used as potting soil instead of conventional soil and you can cultivate your own organic vegetables.

- It is advisable to have one person who will be in charge of the My Green Bin operations.

Please feel free to call us for any clarification.

Let's Segregate the waste. Compost it and Save the environment.

Thanking you
