Report on Intellectual Property Rights Topic: "Filing Indian and US Patents"

By

Dr. Shilpa Sivashankar, Ph D.

Post Doctoral Fellow

KAUST, Saudi Arabia

Date: 01.04.2015

Time: 2 PM to 4 PM

Venue: ECE MTech Class Room, Academic Block, SCE.

The workshop commenced with welcoming the gathering by Prof. Vani A , Dept of ECE and narrated the objectives of the IPR. The faculties of all the department of SCE participated in the programme.

The Speaker begins the talk stating In the world of innovation, India has an old reputation. it remains a minnow when it comes to patents. The path to patents is paved with research and funding. While Indian companies, including startups, universities and research institutes need to direct their attention towards generating more patents if India has to emerge as a hub of inventiveness, it also calls for increased spend on research and development (R&D).

A US patent is granted by the United State Patent Office to an inventor, who has filed his application with it, whereas an Indian Patent is granted by the Indian Patent Office to an inventor, who has filed his application with Indian Patent office. A patent granted by a patent office is applicable within the geographical boundaries of that country only. A US Patent is applicable within USA only and has no effect in India, if the same inventor of the US patent has not filed his application in India for the patent grant. The filing the Patent application discussion was very informative for faculties.

Dr Shilpa Sivashankar

Dr. Shilpa Sivashankar working as a Assistant professor in Acharya Institute of Technology, Bangalore. She has received her B E degree in Biotechnology from Visvesvaraya Technological University. She is the Alumni of Sapthagiri Institute of Technology. She received her PhD in Biotechnology from National Tsing Hua University, Taiwan. She is the life member of IEEE from 2012 and ISTE from 2007. She has over 9 research publications in Foreign Journals and 29 papers in international conferences and also she conducted several workshops. She received Awards from The Institution of Engineering and Technology, National Taipei University of Technology, Taipei, Taiwan and Wiley publications. She is also a recipient of best oral presentation award and best poster presentation award.

Seminar Report

Topic: "Managing Innovation and Entrepreneurship"

By

Mr. Sitaram V Yaji

Freelance Corporate Trainer
Bangalore

Date: 04.10.2014

Time: 10.30 am to 12.30 pm

Venue: Seminar Hall, SCE Bangalore.

This seminar discusses the basics every manager needs to organize successful technology-driven innovation in both entrepreneurial and established firms. The session started by examining innovation-based strategies as a source of competitive advantage and then examine how to build organizations that excel at identifying, building and commercializing technological innovations. Major topics include how the innovation process works; creating an organizational environment that rewards innovation and entrepreneurship; designing appropriate innovation processes (e.g. stage-gate, portfolio management); organizing to take advantage of internal and external sources of innovation; and structuring entrepreneurial and established organizations for effective innovation. The course examines how entrepreneurs can shape their firms so that they continuously build and commercialize valuable innovations. Many of the examples quoted in the session also focus on how established firms can become more entrepreneurial in their approach to innovation.

Report on

Topic: "Seminar on Methods For Formulating Research Problem"

By

Dr. Shilpa Sivashankar

Post Doctoral Fellow

KAUST Saudi Arabia.

Date: 04.08.2014

Time: 2 PM to 4 PM

Venue: M Tech ECE Class room, SCE Bangalore.

The lecture started with an invocation , followed by seeking the blessings of the almighty. The stage was handed over to Dr. KN Ravi, Professor and Head Department of EEE to welcome the participants and guest Dr. Shilpa Sivashankar, Post Doctoral Fellow from KAUST Saudi Arabia.

The Speaker started the session by defining objectives that will help us to develop effective research. It will help the decision makers evaluate the research questions your project should answer as well as the research methods your project will use to answer those questions. In order to do this, we have to identify the environmental variables that will affect the research project and begin formulating different methods to control these variables. Research problems range from simple to complex, depending on the number of variables and the nature of their relationship. Sometimes the relationship between two variables is directly related to a problem or questions, and other times the relationship is entirely unimportant. If we understand the nature of the research *problem as a researcher*, we will be able to better develop a solution to the problem.

To help us understand all dimensions, we might want to consider focus groups of consumers, salespeople, managers, or professionals to provide what is sometimes much-needed insight

into a particular set of questions or problems. There are always consequences to any course of action used in one or more projects. Anticipating and communicating the possible outcomes of various courses of action is a primary responsibility in the research process. The session was useful and motivated participant to formulate research problem statement.

Dr Shilpa Sivashankar

Dr. Shilpa Sivashankar working as a Assistant professor in Acharya Institute of Technology, Bangalore. She has received her B E degree in Biotechnology from Visvesvaraya Technological University. She is the Alurani of Sapthagiri Institute of Technology. She received her PhD in Biotechnology from National Tsing Hua University, Taiwan. She is the life member of IEEE from 2012 and ISTE from 2007. She has over 9 research publications in Foreign Journals and 29 papers in international conferences and also she conducted several workshops. She received Awards from The Institution of Engineering and Technology, National Taipei University of Technology, Taipei, Taiwan and Wiley publications. She is also a recipient of best oral presentation award and best poster presentation award.
