After effects of menopause:

Approaching middle age often brings increased stress, anxiety, and fear. This can partially be attributed to physical changes, such as decreasing levels of estrogen and progesterone. During menopause, the body stops producing estrogen. Estrogen is essential for cardiac, skin and bone health, and many women have complications around these. The bones get weaker, and the person experiences backaches, and shoulder and joint pains. Some women experience stress incontinence, which they may be embarrassed about.

Most women report problems with sleeping; they find it hard to fall asleep or have trouble sleeping through the night. (A gynecologist in Bangalore says that at least 20-25 per cent of her patients complain of insomnia during this period).

TO stay healthy during menopause

Go for regular health check-ups and visit your gynecologist to rule out the possibility of a thyroid malfunction or a disease of the reproductive organs.

Exercise.. Yoga and pranayama can help you stay flexible and maintain your bone health. Get enough exposure to sunlight.

Understand that your body is changing; and set your expectations accordingly.

Pay attention to your diet; eat more frequent meals in smaller quantities. Increase your intake of fiber, natural vitamins and minerals.

Date and Day	08/04/2016 and Friday
Collaboration	Eco and Health Clubs

Place of the event conducted	Govt. School, Bengaluru
Report: As per the direction of Principal, a team of faculty and student volunteers organized an event “Interacting with Govt. School students on paper and waste management” at Government school, Bengaluru. The Program was organised and co-ordinated by Prof. Ram kumar (NSS Club) in association with Prof. Dhamodharan (Health club), Prof. Ramya (ECO Club) along with students from Community, Eco and Health clubs. There was a good interaction with the students. Basically if the papers are not reused then more number of trees are again made to cut, that leads to deforestation and there by affects the Eco- System. Also by recycling the paper financial burden can be reduced upto some extent. In the same way by waste management including E-waste, chemical waste so on all these waste has to treated or if possible converted to usable form. This will help in keeping the environment healthy and finance too. In this way we addressed the school children and we were successful in winning the mind and heart of the students with this regard.	
Impact & Sensitization	It will help lot to the patient who needs the blood in time.
Faculty Coordinators	Prof. Dhamodharan, Prof. Ramya, Prof. Ram Kumar.

Issues addressed	Importance of food, exercise, habits for a healthy life and importance of cleanliness to maintain hygiene
Place of the event conducted	Gopalpur village
Report: All the villagers were told about the healthy eating habits and good hygiene. Good health is necessary for a good life style and society. Good health is a result of good hygiene. Good personal hygiene is important for both health and social reasons. It entails keeping your hands, head and body clean so as to stop the spread of germs and illness. Your personal hygiene benefits your own health and impacts the lives of those around you, too. Good personal hygiene habits include: We need to wash the body often. For this, a swim or a wash all over the body with a wet sponge or cloth will do. We need to clean the teeth at least twice a day. We need to wash the hair with soap or shampoo at least once a week. We need to wash hands with soap after going to the toilet. We should be careful when we are down with any ailments. We should keep our surroundings clean. We should drink plenty of water everyday especially in summer.	
Impact & Sensitization	A word of good health is spread across the villagers and consumption of healthy food has increased. They got the importance of hygiene.
