Enable HP Web Services

NOTE: HP Web Services requires the printer to be connected to a network.

1. Once the printer is connected to a network, enter the printer's network IP address into a Web browser. To find the printer's IP address, refer to the printer's user guide, or reprint this page after the printer is connected to the network.

2. On the Web page that appears, click on the HP Web Services tab.

3. Review and accept the terms of use, and then click the Enable button.

HP ePrint

Print from Anywhere

HP's free ePrint service provides an easy way to print from e-mail, anywhere and anytime. Simply attach a file to an e-mail, and send it to this printer's e-mail address. The attachment will print automatically on this printer. Supported attachment file types include .pdf, .jpg, .tif, and Microsoft Office(R) documents.

NOTE: Attachments may print differently than they appear in the software program which created them, depending on the original fonts and layout options used.

Your Printer is Protected

To help prevent unauthorized e-mail, HP assigns a random e-mail address to your printer, never publicizes this address, and by default does not respond to any sender. ePrint also provides industry-standard spam filtering and transforms e-mail and attachments to a print-only format to reduce the threat of a virus or other harmful content.

NOTE: The ePrint service does not filter e-mails based on content, so it cannot prevent objectionable or copyrighted material from being printed.

HP ePrintCenter

Use the HP ePrintCenter Web Site

Use HP's free ePrintCenter Web site to set up increased security for ePrint, specify the e-mail addresses that are allowed to send e-mail to your printer, get Print Apps (if available for your product), and access other free services.
