Sub- Sanction of Research grant for the research project "Analysis and Design of Multistoried Parking Building Proposed at Jalahalli Cross"

In pursuance of the proceedings of the research committee and approval of the Principal through his letter dated 06/11/2017, the management in its meeting has decided to sanction the research grant. The management is pleased to sanction Rs.2,80,000/- (**Rupees two lakhs eighty thousand only**) for the Civil Engineering department for carrying out the project, "Analysis and Design of Multistoried Parking Building Proposed at Jalahalli Cross", by Prof. Pramod K R as per the recommendation of RDECI.

The Principal is directed to facilitate the sanction of the amount and follow all the necessary procedure of the accounts and submit the utilization certificate after securing the same from the researcher.

Respected Sir,

Subject: Requisition for the financial assistance for research project

With respect to above subject, I request your kind self to provide financial assistance to carry out the project entitled "ANALYSIS AND DESIGN OF MULTY STOREYD PARKING BUILDING". The research proposal and budget split up has enclosed along with this letter. Kindly consider the requisition and do the need full.

Thanking you

yours sincerely

B. DETAILS OF THE PROJECT PROPOSAL

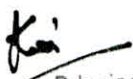

1.	Title of the Project Proposal	:	ANALYSIS AND DESIGN OF MULTI STOREYED PARKING BUILDING
3.	Objectives of the proposal (Not more than six points)	:	<p>1. To propose a multi storeyed building near Jalahalli cross. As space, congestion on streets may arise. To overcome this problem we are suggesting to provide the parking complex.</p> <p>2. To reduce the parking area by providing multi-storeyed parking building. multi-storey car parks are located where land costs are so high, e.g. in or about the central areas of large towns, that it is more economical to build vertical facilities rather than purchase additional land for surface parking.</p> <p>3. To provide the safety and secured environment for the parked vehicles. The facility will provide a suitable parking environment for citizens and visitors to the commercial area.</p> <p>4. To reduce the traffic congestion.</p>
4.	Background of the project	:	<p>Now-a-day there is an increase in the number of vehicles on road. It is very easy to park vehicle on road or when vehicle are moving. But, when the vehicle stops, we cannot leave vehicle on road or unsafe place. For proper storage of vehicle when not in use "parking space" is needed. When the person has to stop on route for some purpose other than traffic related, the vehicle needs some halting facility, without disturbing traffic flow otherwise on the street. Such a facility is called parking. Due to increase in population there is increase in vehicle demand and we require more parking space thus in control by constructing multi-storeyed parking building. Parking building is used for safe-guarding the user vehicle. Successful parking structures meet the user demands. It includes feeling safe and also knowing that their</p>

26

		vehicles are in a secure environment. Where parking area is unplanned, there is a need to make an improvement in the parking area by constructing multi-storeyed parking building. Parking structures has been an important element in today's urban and suburban environments. Multi-storey parking will help in larger capacity parking. The parking floors, the ramp, the entrance and the exits should be well lighted by using solar panels.
5.	Methodology (Please include flow sheet, if required)	: 1. Investigate the area where parking congestion is high, study of SBC of the soil Planning for multi storey parking. 2. analysis and design of multi storey parking building using ETABS-2016 3. Estimation and costing of building.
6.	Milestones with time schedule & work plan	: Project started in Jan 2018 and ended in July 10, 2018
8.	List of equipment required for Phase-I & Phase-II for Project Implementation (as per the instruction Sl.No.27 under Annexure-II)	: ETABS -2016 Software Rs.2,80,000 apprx
9.	Relevance, importance & application of the project	: Reducing traffic by proving parking building at Jalahalli cross, Bengaluru.
10.	Novelty/Uniqueness of the project proposal	: Multi storey parking building.
