

## Analysis software training programme

The glims on analysis software for carrier opportunities in design industry conducted on 12<sup>th</sup> oct 2016 in the department of civil engineering. In the presence of 2<sup>nd</sup> year 40 students and civil department faculties. The talk is about design softwares given by Mr.Rajesh B business head Cadd centre in the Sapthagiri College of engineering.

CADD Centre's advanced programs are best suited for the fresh diploma and engineering students in Civil stream. This program gives the basic understanding and facilitates participants to do the drafting and the Structural Analysis comfortably. This provide the students good understanding on Drafting and Analysis tools used in Civil industry.

Engineering contains a large number of job opportunities and specialties. With each specialty, the software's will give wide employment trends, possibly career advancement opportunities.
