Induction Program Phase-II Report for the Academic Year 2019-20

The program was designed to make the newly joined Engineering students feel comfortable and sensitize them towards exploring their academic activities and interests, making them work for supremacy and promote bonding between them, to build better relationships with teachers also to give a broader view of life in building of good character.

When newly joined students enter an institution, it's very important to educate them to adjust to the new environment and inculcate the ethos of the institution with a perception of a larger purpose since they come from diverse ideas and various backgrounds. Therefore a long term induction program for the first-year students has been introduced in the institution as per the AICTE & VTU direction.

The purpose of the induction program is to make the newly joined students feel comfortable in the institution and set a healthy daily routine, enhance awareness regarding social and human values, and establish a better bonding.

Induction Program Phase II was conducted for first-year students AY 2019-20 from 10/02/2020 to 21/02/2020.
